Planning content and styles for features area:

In this lesson we're going to style the features and photos modules. If you look at the finished layout, you'll see that the features module is composed of rows with a class of `row` and `features__row`. They are virtually the same as the basic row apart from having extra margin. Inside each row we have `features__heading` and `features__text`. There is also graphics in the features: bike, phone, and safe. We're going to style it for small screen first, so initially they're all going to sit one on top of each other.

Creating HTML elements for features

Open up *index.html* and paste the following code:

```
<div class="row row--white row--padding-wide features">
  <div class="row container-medium">
    <div class="row features__row">
      <div class="col-narrow--right features__bike">
      </div>
      <div class="col-wide">
        <h2 class="features__heading">
          Easy to use, money management.
        </h2>
        <p class="features__text">
          Nemo enim ipsam voluptatem quia voluptas sit aspernatur aut odit aut fugit, sed quia consequuntur magni dolores eos qui
ratione voluptatem sequi nesciunt.
        </p>
      </div>
    </div>
    <div class="row features__row">
      <div class="col-narrow features__phone">
      </div>
      <div class="col-wide--right features__padding">
        <h2 class="features__heading">
          Day to day breakdown.
        </h2>
        <p class="features__text">
          Nemo enim ipsam voluptatem quia voluptas sit aspernatur aut odit aut fugit, sed quia consequuntur magni dolores eos qui
ratione voluptatem sequi nesciunt.
        </p>
      </div>
    </div>
    <div class="row features__row">
      <div class="col-narrow--right features__safe">
      </div>
      <div class="col-wide">
        <h2 class="features__heading">
          Connect securely with your bank.
        </h2>
        <p class="features__text">
          Nemo enim ipsam voluptatem quia voluptas sit aspernatur aut odit aut fugit, sed quia consequuntur magni dolores eos qui
ratione voluptatem sequi nesciunt.
        </p>
      </div>
    </div>
  </div>
</div>
```

```
</div>
```

Styling feature areas

Open up *modules.css* and paste:

```css
.features { text-align: center; }
.features__row
{
  margin-bottom: 2.1875em;
  /* 35px/16px */
}
.features__heading
{
  margin: 0 0 .75em;
  /* 12px/16px */
  font-size: 1.125em;
  /* 18px/16px */
}
.features__text { margin: 0; }
.features__bike
{
  height: 90px;
  background: url(../img/icon-bike.png) no-repeat center;
  background-size: contain;
}
.features__phone
{
  height: 149px;
  background: url(../img/icon-phone.png) no-repeat center;
  background-size: contain;
}
.features__safe
{
  height: 80px;
  background: url(../img/icon-safe.png) no-repeat center;
  background-size: contain;
}
```

Creating Feature styles for wide screens

We've done the narrow screen version, so it is time to add media query to apply styling for wide screens:

```css
@media (min-width: 38em)
{
  .features { text-align: left; }
  .features__row
  {
    margin-bottom: 4.1667em;
    /* 75px/18px */
  }
  .features__row:last-child { margin: 0; }
  .features__padding
  {
    padding-top: 4em;
    /* 72px/18px */
  }
  .features__heading
  {
    font-size: 1.5556em;
    /* 75px/18px */
    font-weight: normal;
  }
}

@media (min-width: 50em)
```

```
{
  .features__bike { height: 154px; }
  .features__phone { height: 296px; }
  .features__safe { height: 141px; }
}
```
